

Gas sensor

A gas detector is a device that detects the presence of gases in an area.

For instance, a gas detector can sound an alarm to operators in the area where a gas leak is occurring, giving them the opportunity to leave.

[How to use gas sensor with Arduino](#) will support you in your projects!

This project has received funding from the European Union's Horizon 2020 Coordination & Research and Innovation Action under Grant Agreement No 731345.
