

Conductive thread

A little thicker than every day thread, but still thin enough to be sewn in medium-eye needles or with a sewing machine that can handle "heavy" thread.

It is ideal for any wearable/e-textile project. It is made of stainless steel fibers, thus your projects will not "stop working" because of oxidation after a few months and its safe to wash.

In [Conductive Thread - 10 tips](#) you get inspiration for your project!

This project has received funding from the European Union's Horizon 2020 Coordination & Research and Innovation Action under Grant Agreement No 731345.
